

MATERIALS SCIENCE · THERMAL ENGINEERING · SPACE RESEARCH

THE 4th CONFERENCE ON MATERIALS AND TECHNOLOGIES FOR EXTREME CONDITIONS

The 4th Conference on Materials and Technologies for Extreme Conditions brings together researchers, industry professionals, defense experts, and students for a day of knowledge sharing, innovation, and collaboration. The conference will showcase cutting-edge research, advanced technologies, and emerging applications in materials and engineering for extreme environments. The program will feature invited talks, technical presentations, a student poster session, networking opportunities, and a guided tour of the **THERIS** research facilities, offering a unique platform to connect with the forefront of materials science and engineering in Israel.
